FLOWCORE[®] PHANTOM SERIES

THE CHEMICAL INJECTION CONTROLLER OF THE FUTURE

The FlowCore[®] Phantom Series is the chemical injection controller of the future. With installation taking less than 20 minutes, bring intelligence, precision, and reliability to new or existing single-point injection applications.

Utilizing our sophisticated multi-patented technology, the Phantom precisely injects, monitors, and records doses accurate up to a hundredth of an ounce.

With low cost and extreme ease of use, the Phantom breaks the barrier in simplifying target dose calculations and attaining true chemical injection optimization every day.

Gain visibility of your chemical program while decreasing failure rates and man hours in the field.

Specifications:

- Single Pump / Chemistry
- 110VAC or 12-24VDC
- General Purpose or C1D2
- UL Certification

Features:

- User-friendly color touch screen display
- Precisely compensates injection for changes in temperature, pressure, and pump performance

Communication Options:

- SCADA (TCP/IP, Modbus, etc.)
- FlowSite (online platform)

"If you can't measure it, you can't manage it."

- Peter Drucker
